The Team

Management members of SD Technologies' have a combined knowledge of over 30 years' experience in Software development, Customer Services, Procurement, Human Resources, Industrial Relations, Training and Development

Vision

To continue driving force behind our growth. Our desire is, to build an institution that would outlast our lives, and a strong inclination towards being driven by values

Mission

To provide our clients with the most optimal, cost-effective and robust solutions, which boost up the increase in the returns and productivity of their businesses by becoming a service provider of choice for our every client , outperforming our direct competition in the quality, efficiency and diversity of the services we offer.

Business Philosophy

At SD Technologies, we push the limits of technology to create systems of the utmost quality. With the highest of ethical standards and pure dedication to excellence in all operational aspects, we aspire to exceed our customers' expectations.

Values

Even while we embark on the roadmap that we have set ourselves, we seek to uphold the values that define the nature of our relationships with each other and with our customers. Simply put, they are:

Integrity

Our desire is to stick to our commitments whatever the cost. Our leaders ensure that they not just do things right but also display vision and character. Stewards who are focused towards their goals and help the entire organization navigate through strategies and decisions

Excellence

Ours is a continuing drive to do the very best that we can do and adopting high standards of ethics in all business actions and practices

People

We respect every person regardless of their status. We seek to develop the talents of those whom we work with. We will provide an environment of Leadership and transparency.

Customer

We thrive to exceed expectations of our customers through win / win solutions. We uphold a culture of world class customer service as provide customers with high quality services, tailor-made to their needs and expectations;

Quality

Quality consciousness permeates throughout our organization and quality procedures form an intricate part of our development process. Our internal processes and workflow are aligned to supportively achieve targeted results. Aligning all operations through our in-house Intranet and the extensive use of project management tools are in keeping with the process-centric approach that we adhere to.

Community

It is our responsibility to build and enrich the community in which we operate.

Communication

We communicate openly with our customers and foster a relationship of frequent feedback and interaction
